

DISINFECTION

**How Important
Is it?**

Disinfection in hospitals and nursing homes is critical. This fact is widely recognized by health care authorities and regulatory officials.

X² out performs other sanitizers and disinfectants.

Kills Bacteria* in 10 Minute wash cycle. **Low Temperature 125°F**
 *Kills *Staphylococcus aureus*, *Pseudomonas aeruginosa*, *Klebsiella pneumoniae*, *Escherichia coli*, *Proteus mirabilis*, *Salmonella choleraesuis*, *Enterococcus faecium*

Also important is the necessity of hotels, motels and prisons to provide clean, sanitary linens free from disease causing pathogens.

Unlike quaternary sanitizers which are affected by cold water and hard water, the active disinfectant ingredient in X² performs well under such adverse conditions.

Chlorine must be used in high concentrations to sanitize and in even greater concentrations to disinfect. This has the effect of severely degrading cottons. Organic soils rapidly inactivate chlorine.

In addition, chlorine reacts with organic matter to form trihalomethanes which are suspected carcinogens. Trihalomethane concentrations are regulated by the US EPA not to exceed 80ppb.

Wash 'N Bleach Extra² is a registered trademark of the Noramtech Corporation

WASH 'N BLEACH EXTRA²®

CHANGES THE WAY LAUNDRY IS DONE

Gone are the cumbersome multiple pails and drums currently used.

US EPA Registration No.16930-5

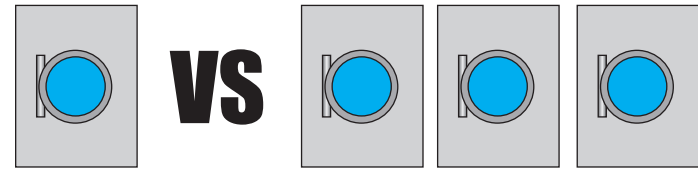

US Patent No. 5,981,463

**INTRODUCING A NEW LAUNDRY PRODUCT THAT
 WILL WASH, BLEACH, DISINFECT, PROTECT LINENS,
 SAVE WATER, SEWAGE, ENERGY AND REDUCE THE
 COST OF LINEN REPLACEMENTS.**

NORAMTECH CORPORATION •

ENVIRONMENTALLY FRIENDLY WASH 'N BLEACH EXTRA²® DISINFECTANT

ONE WASH CYCLE INSTEAD OF THREE OR FOUR

***NOW YOU CAN GET BETTER RESULTS
BY USING SOLID X² LAUNDRY DETERGENT
WITH A BUILT-IN DISINFECTANT***

**SIMPLIFY YOUR JOB AND
ELIMINATE HAZARDOUS CHEMICALS.
SOLID WASH 'N BLEACH EXTRA²®
WITH DISINFECTANT IS THE ANSWER!**

**FABRIC
FRIENDLY
COLOR-SAFE
BLEACH**

**REPLACING LINENS IS THE SECOND
GREATEST EXPENSE IN DOING LAUNDRY**

Wash 'N Bleach Extra² is gentle on linens and produces very little lint. Chlorine bleaches and high alkaline detergents are detrimental to fabrics.

WATER:

Save 44 gallons of water for every 50 lb. load of laundry you process on a programmable machine. This can amount to hundreds of thousands of gallons of water every year for even moderately sized facilities.

SEWAGE CAPACITY:

Relieve the pressure on our sewage plants by reducing effluents. Because of our rapidly growing population, many sewage plants are finding it difficult to handle the additional load.

GAS:

It can take 60 cents worth of gas to heat 44 gallons of water from 55°F to 140°F. By using only one cycle on 2-50lb machines and saving water from every washload with Wash 'N Bleach Extra², you can realize a savings of between \$4,000 to \$6,000 per year just for the gas.

ELECTRICITY:

It takes about one kilowatt to run a 50lb machine per load. This can be cut in half with Wash 'N Bleach Extra². It's like turning off ten 100 watt bulbs.
